

# shadow

airless by RICHMOND

- Self-sealing nozzle to stop residue forming at the exit point, saves your formula from clogging the nozzle and prevents cream re-entering the container.
- A neutral path for your product – metal-free formula flow.
- Save time on the production line: snap-on actuator gives a seamless filling procedure.
- Powerful suction force resulting in a smooth flow of even the most viscous creams.
- Range of sizes available: 50ml, 100ml (see our mystique range for smaller options)
- Supplied as just two components, with pre-assembled overcap and actuator.
- Height with cap 94mm
- Diameter 49.2mm

unique shut off valve gives superlative protection from air and skin contact

user controlled dosage: 1.5ml nominal

Pre-assembled overcap

Fast, easy top fill with simple 'snap-on' cap

Validated US Pharmacopoeia resins OTC compliant
